

FlexIT for SMBs

The same technology - for 20% less.

Giving employees access to the latest technology helps them be more productive, engaged and feel more connected.

In a growing business, it's not always possible to continuously invest in tech - but you need access to these tools to grow.

That's why we've launched FlexIT for SMBs - bringing savings of up to 20% on technology for small businesses.

How it works

- ➔ Up to 20% discount on the latest technology*
- ➔ Pay for your technology in manageable installments over 36 months
- ➔ Free collection of your existing equipment
- ➔ Free, fully GDPR compliant data wiping

Invest to protect your business

Now has never been a better time to upgrade your tech. Support for Windows 7 ends on 14th January 2020 - after which point you leave yourself exposed to security risks and unplanned maintenance and upgrade costs. Upgrading now will give you the peace of mind that your technology estate is fully supported and as efficient as possible.

Why Freedom Tech?

- ➔ Financially strong business wholly owned by CSI Leasing - one of the world's largest equipment leasing companies with over \$1.6 billion in assets
- ➔ Finance and Leasing Authority (FLA) registered
- ➔ Data processing fully compliant with GDPR and to ISO 27001 standard
- ➔ Partnered with leading manufacturers - choose from HP, Lenovo and Dell hardware
- ➔ End-to-end service - we'll collect your old hardware and securely wipe it free of charge
